

Pump construction

Close-coupled drivers are conventional drivers mounted directly to pumps frame. No base, coupling or guards are required for this mounting style.

Universal Flanges Connections that meet DIN PN16 and ANSI 150#.

Performance curves

Operating Limits

- Max viscosity: 200cSt
- Max system pressure: 6 bar
- Flow up: to 140 m³/h
- Head up: to 44m
- Temperature ratings:
from -22 °F (-30 °C)
to +194 °F (+90 °C)
- Electric motors:
from 1,5 up to 18,5 kW
- Available ATEX II - / 3G cbk II C T5

HORIZONTAL, SEALLESS PP AND PVDF CENTRIFUGAL PUMP WITH PERMANENT MAGNET DRIVE SYSTEM, NO MECHANICAL SEAL

Manufactured by:

Ndura Vary Industrial Technology(Shanghai) Co; Ltd

CM Series

Separation of liquid chamber/atmosphere by means of an isolation shell is the best solution to pump aggressive chemical, high purity liquids and liquids difficult to seal.

The hermetical sealless is the best solution for the chemical and pharmaceutical industry.

A wide range of pumps covers the different performances.

Simple construction combine with high thickness that guaranteed a long life against the corrosion.

PUMP DETAILS

Epoxy primer and polyacrylic enamel water-based painting for the best quality resistance linked to the environmental respect.

Pump casing shall be one single piece, achieved from solid bar, made of very high thickness PP and PVDF to have a good mechanical resistance and a guaranteed long life against the corrosion.

RWP QUICK CHANGE CARTRIDGE KIT to guarantee an easy and fast maintenance, materials PP and PVDF.

The sealing system with O-Rings prevents from leaking to the atmosphere – different materials available:

- EPDM
- VITON®

The rear shell is made of thermoplastic materials, as PP GFR or PVDF FCR with zero magnetic losses.
Outside rear shell cover ellipsoidal profile made of fiber reinforced composite material.

High power synchronous magnetic coupling designed by our Technical Office and with magnetic elements mechanically locked.

Rare earth guarantees the magnetic-balancing to avoid the thrust bearing wear and the heat generation.

Field assembling of the product lubricated bearing arrangement does not require special tools.

The Shaft / Bearing materials are available in three different configurations to provide the best solution for each application:

- PTFEC – ALLUMINA 99,7% (standard);
- CARBON – ALLUMINA 99,7%;
- Silicon Carbide (SSIC) – Silicon Carbide (SSIC)

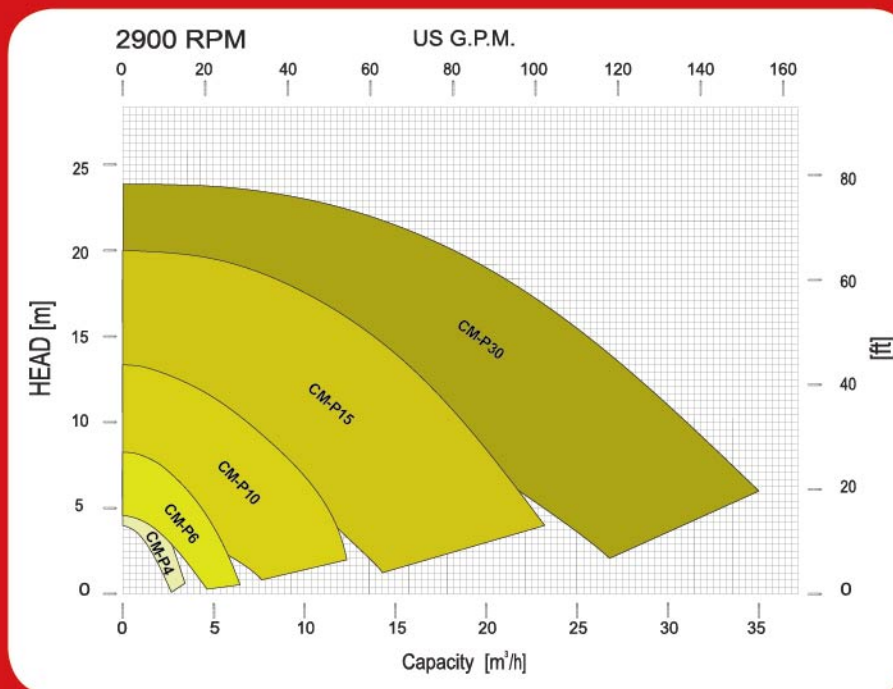

Outline drawings

Pump Name	GR.	A	B	C	D	E	F	G	H	I	L	M

Performance curves

Pump construction and Operative Limits

Close-coupled drivers are conventional drivers mounted directly to pumps frame. No base, coupling or guards are required for this mounting style.

- Connections: Threaded BSP (GAS) & NPT
- Max viscosity: 200 cSt
- Max system pressure: 5 bar
- Flow up: to 35m³/h
- Head up: to 23 m
- Temperature range:
from 24 °F (-5 °C)
to +194 °F (+90 °C)
- Electric motors from 1,5Kw up to 5kW

**HORIZONTAL, SEALLESS PP AND PVDF
CENTRIFUGAL PUMP WITH PERMANENT
MAGNET DRIVE SYSTEM, NO MECHANICAL SEAL**

CM Series

The separation of liquid chamber/atmosphere by means of an isolation shell is the best solution to pump aggressive chemical, high purity liquids and liquids difficult to seal.

Hermetic sealless injection moulded thermoplastic pumps are the best solution for light duty applications.

A wide range of pumps covers the different performances.

PUMP DETAILS

Making a comparison between this range of pumps and the other two Nudra Vary PUMPS series CM and CMS, the correct definition becomes few components (extremely easy maintenance), competitive prices, guaranteed chemical compatibility.

Pump casing shall be one single piece, injection moulded designs, made of GFR PP and CFR PVDF.

RWP QUICK CHANGE CARTRIDGE KIT
to guarantee an easy and fast maintenance, materials PP and PVDF.

The sealing system with O-Rings prevents from leaking in the atmosphere – different materials available:

- EPDM
- VITON®

The rear shell is made of thermoplastic materials, ellipsoidal profile, zero magnetic losses, GFR PP or GFR PVDF materials.

High power synchronous magnetic coupling designed by our Technical Office and with magnetic elements mechanically locked.

Rare earth guarantee the magnetic-balancing to avoid the thrust bearings wear and the heat generation.

Field assembling of the product lubricated bearing arrangement does not require special tools.

The Shaft / Bearing materials are available in two different configurations to provide the best solution for each application:

- PTFEC – ALLUMINA 99,7% (standard)
- CARBON – ALLUMINA 99,7%
